WEDDINGS

About us

At The Botanical Bunch, we create sustainable flower arrangements that look fresh and vibrant but last for years at a time. We believe that your wedding flowers should be cherished for more than just a day, and our arrangements promise you a few more years of love. We have been able to help over 350 wonderful couples, say I do!

We deliver flowers throughout the UK and offer in-person flowering services in and around London. Our couples receive a unique service, and our team is dedicated to bringing your floral visions to life.

What makes our flowers sustainable?

The Preservation Process

Our preserved flowers undergo a special treatment where the sap is replaced with 100% plant-based glycerine and natural dyes.

This keeps the flowers looking and feeling natural for many months/years. The dyes can sometimes rub off so please read our care instructions to keep your bunch looking good for as long as possible.

The Drying Process

Our dried flowers are hung for several weeks in a well-ventilated space so that the moisture leaves and the flower/grass or foliage turns brittle. They then no longer rely on water to survive and will keep well in a shady space with no moisture or wind.
