Sustainable event flowers

The Botanical Bunch

# Our Mission

The Botanical Bunch are an eco-friendly florist, specializing in weddings, events and photoshoots.
We offer waste-free floral designs by working with natural stems that have been dried or preserved.
Our love for nature and the planet is at the heart of everything we do.
We are dedicated to sustainable practices and to providing our customers with the highest level of quality and care

When you book us to design and install our flowers you get the option to buy or hire the arrangements.

- If kept you can gift them to event attendees, take them home, or use them to brighten up the office.
- If hired, the stems will be put to future use in more installations or flower confetti

Not only are the stems reusable, but so are the mechanics, which means that nothing goes to waste.

Waste-free

Sustainable

# What makes our flowers sustainable?

## The Preservation Process

Our preserved flowers undergo a special treatment where the sap is replaced with 100% plant-based glycerine and natural dyes. This keeps the flowers looking and feeling natural for many months/years. The dyes can sometimes rub off so please read our care instructions to keep your bunch looking good for as long as possible.

## The Drying Process

Our dried flowers are hung for several weeks in a well-ventilated space so that the moisture leaves and the flower/grass or foliage turns brittle. They then no longer rely on water to survive and will keep well in a shady space with no moisture or wind.

Email or call us with your enquiry Info@thebotanicalbunch.co.uk
07860857411
We will scope out the space and create a mood board and quote considering your style and meeting the vibe for the event.

We will show you samples of the designs in the days leading up to the event (or further in advance when required)

On the day of, we will come and set up the pieces and can collect them when it finishes or the following day depending on what we have designed and if you have hired/brought the arrangements.
